FRONT END DEVELOPER

Analytical and detail-oriented Mechanical Engineering Graduate transitioning into Front-End Development, leveraging a strong foundation in complex problem-solving, structural logic, and system optimization. Proficient in HTML5, CSS3, JavaScript (ES6+), React, and modern responsive design principles. Adept at translating user requirements into clean, performant, and visual web interfaces. Driven by a passion for technical precision and eager to deliver impactful user experiences in a collaborative development team.

Core Competencies

- Modern JavaScript (ES6+)
- Component-Driven Architecture
- Responsive Web Design
- RESTful API Integration
- Version Control (Git/GitHub)
- State Management
- Process & Quality Keywords
- Semantic HTML5 & WCAG
- CSS F/works & Utility Tooling
- UI/UX Prototype Translation
- Web Performance Optimization
- Browser Developer Tools

Technical Skills

- React, JavaScript ES6+, State Management
- HTML5, CSS3, Flexbox, Grid, Tailwind CSS
- REST APIs, Axios, Async/Await, Hooks Real-time
- Git, GitHub, Vite, ESLint
- WCAG, Semantic HTML, ARIA, Keyboard Nav
- DevTools, Lazy Loading, Asset Optimization

Profile Summary

- Modern JavaScript (ES6+) & Component-Driven UI Development: Engineer modular and maintainable user interfaces using modern JavaScript (ES6+), React, and component-driven design principles. Translate design specs into clean, reusable UI components with state management, prop validation, and efficient DOM rendering.
- Responsive Web Design & CSS Frameworks: Craft responsive, pixel-perfect web layouts across desktop, tablet, and mobile displays using HTML5, CSS3, Flexbox, Grid, and utility frameworks like Tailwind CSS. Prioritizes mobile-first development, cross-browser compatibility, and consistent visual styling.
- API Integration & Asynchronous Data Fetching: Connect front-end interfaces with RESTful APIs and asynchronous back-end services using JavaScript (fetch/Axios) and React hooks (useEffect). Manage loading states, error handling, and API responses to deliver seamless, dynamic user experiences without page reloads.
- Code Quality, Version Control & Developer Tooling: Maintain clean, production-grade code using Git, GitHub, ESLint, and modern build tools (Vite/Webpack). Apply structured branching strategies, version control workflows, and code modularity to collaborate effectively within modern software development teams.
- Web Accessibility (a11y) & Semantic HTML: Build inclusive and accessible web experiences adhering to WCAG guidelines and Semantic HTML5 standards. Implement proper ARIA attributes, keyboard navigation support, color contrast standards, and screen-reader compatibility to ensure access for all users.
- Web Performance & UI Debugging: Optimize web application performance and visual responsiveness through DOM manipulation, asset minification, lazy loading, and Browser Developer Tools. Diagnose layout shifts, debugs JavaScript execution, and refactors code to reduce initial load times.

Education

- B.E. in Mechanical Engineering from PSG College of Technology, Coimbatore in 2021, secured 7.8 CGPA
- Higher Secondary from Sri Jayendra Swamigal Silver Jubilee School, Tirunelveli in 2016, secured 93.9%
- SSLC from Ravilla KRA Vidhyashram, Kovilpatti in 2014, secured 98%

Projects

- Travel Agency Landing Page
- Income Expense Calculator
- Add To Cart Using Router
- Card Flipping Memory Game
- Add To Cart Using Modal
- Movies Search App

Personal Particulars

Date of Birth: 07 May 1999 | Languages: English, Tamil and Telugu
